Sponsorship / membership of organizations by issue

Objectives	Our Position and Contribution	Name of Organization	Organization Details	Total Spending in 2023 (THB)
To promote and support education, research, training, and dissemination of academics and technology related to the industry including EV and energy management and conservation.	As members of associations promoting the use of renewable energy in Thailand and expanding business opportunity in this region, the Company contributes to sharing and gaining best practices, industry insights, rules and regulation update, and future trends. Through our membership fees, we contribute to the lobbying activities of such business associations to advocate for more governmental support and updated legislation to facilitate wider use of renewable energy, the new construction of renewable energy infrastructure, and new transmission and distribution infrastructure to prepare for increasing electrification (i.e. all type of EVs) in the near future	The Federation of Thai Industries (FTI)	FTI is a trade association that convenes industry leaders in Thailand to promote economic development. FTI represents Thai companies at both the domestic and international levels, collaborates with the government in establishing and revising national policies, and helps develop industrial enterprises, including renewable energy and electrical vehicle businesses and related businesses.	255,556.07
To support and push for environmental conservation and restoration by enhancing the wealth of natural resources and the environment	As renewable/EV producer, sponsor Natural Resources and Environmental Policy and Planning to support environmental conservation and restoration as it aligns with their core values of sustainability and eco-friendliness. By investing in the enhancement of natural resources and the environment, the company not only contributes to the planet's health but also fosters a positive public image, strengthens its brand, and potentially expands its customer base. Additionally, a healthier environment supports the long-term viability of renewable resources, which is essential for the company's business model.	Natural Resources and Environmental Policy and Planning	The Office of Natural Resources and Environmental Policy and Planning (ONEP) is an agency under the Ministry of Natural Resources and Environment (MNRE). Its mission to propose the policies and plans for the conservation and management of natural resources and environment of the country, as well as support the operations leading to effective implementation, close monitoring and reliable environmental impact assessment according to the EIA report. The ultimate goal is to strengthen the economy and maintain the sustainable development and people's quality of life.	500,000.00

<p>To create a comprehensive view of global commodity markets, enabling smarter business decisions</p>	<p>As renewable/EV producer, having a partnership with Independent Commodity Intelligence Services (ICIS) provides insights into supply and demand trends, price fluctuations, and emerging opportunities in the raw materials needed for renewable technologies and electric vehicles.</p>	<p>Independent Commodity Intelligence Services (ICIS)</p>	<p>ICIS is a trade association that helps connect data, customers, and the global commodities market and provide real-time price data, market analytics, and policy and regulatory impact analyses on the global energy market</p>	<p>325,085.75</p>
<p>To support and promote government policy and the private sector in the field of renewable energy</p>	<p>By supporting initiatives that encourage government and private sector investment in renewables, the company can benefit from infrastructure development, subsidies, and incentives that make renewable energy more accessible and cost-effective. This strategic partnership can accelerate the transition to clean energy, directly benefiting the company's market growth and reinforcing its commitment to sustainable practices.</p>	<p>Clean Energy for Peoples Foundation</p>	<p>It is a non-profit organization to support and promote government policy and the private sector in the field of renewable energy, help promote energy and environmental conservation, and support research studies in collaboration with public and private organizations or other charitable organizations.</p>	<p>200,000.00</p>
<p>To Promote education about electrical and energy engineering research and applications as well as power development from Alternative and Renewable Energy</p>	<p>Our contribution has a purpose to cultivate a skilled workforce and drive innovation in the field. This investment in education can lead to advancements in technology that improve efficiency and reduce costs, benefiting the industry.</p>	<p>The Power & Energy Society (IEEE) Thailand</p>	<p>The function of IEEE Power & Energy Society - Thailand Chapter are to corporate closely with IEEE Thailand Section , to promote and support electrical power and energy transfer and exchange of technical information to IEEE members and Thai engineers, arrange jointly with local utilities and universities on technical seminar, tutorial, workshop and conference in power and energy fields for public interest in Thailand and neighboring countries.</p>	<p>42,056.07</p>
